## Component

École Nationale  
Supérieure  
d'Électrotechnique  
d'Électronique  
d'Informatique  
d'Hydraulique  
et des  
Télécommunications

## In brief

> **Code:** N7EN09B

# Presentation

---

## Objectives

Present the principles and basic technologies in the area of middleware, allowing the construction of distributed applications

---

## Description

- the socket interface
- the client-server model and remote invocation tools (RPC, RMI, web services)
- message oriented middleware (JMS)
- application integration (ESB)
