

# Transport and Mixing

Component  
École Nationale  
Supérieure  
d'Électrotechnique  
d'Électronique

## In brief

- **Code:** N9EM06C
- **Open to exchange students:** No

## Presentation

### Objectives

Introduction to the physical processes involved in the transport and mixing of substances, whether of anthropogenic origin or not, in environmental situations. It also presents some of the methods used to model the evolution of substances released into the natural environment.
